CONTROL SYSTEM FOR STORAGE MEANS

Abstract of the Invention

~~The invention relates to a provision of a system and control~~ Means which allows the storage and subsequent retrieval of data on a storage means such as, for example, a storage means in the form of, and known as, a hard disk drive. ~~Furthermore the invention is related to~~ The storage of data ~~is~~ in the form of video, audio and/or auxiliary data ~~which is transmitted from a remote location and received by receiver apparatus for the processing and subsequent generation of video, audio, and/or auxiliary data via a television screen connected to or including the receiver. In some instances the data is not decoded and displayed immediately, and the decoding and/or the display of the data, when it does occur may be obtained from the storage means. The control system of the storage means includes a First In First Out (FIFO) buffer which in conjunction with a Central Processing Unit (CPU) controls the generation of the control signals and the storage of the incoming data.~~

Below is a clean version of the amended Abstract of the Invention

CONTROL SYSTEM FOR STORAGE MEANS

Abstract of the Invention

Means which allows the storage and subsequent retrieval of data on a storage means such as, for example, a storage means in the form of, and known as, a hard disk drive. Furthermore, The storage of data is in the form of video, audio and/or auxiliary data transmitted from a remote location and received by receiver apparatus for the processing and subsequent generation of video, audio, and/or auxiliary data via a television screen connected to or including the receiver. In some instances the data is not decoded and displayed immediately, and the decoding and/or the display of the data, when it does occur may be obtained from the storage means. The control system of the storage means includes a First In First Out (FIFO) buffer which in conjunction with a Central Processing Unit (CPU) controls the generation of the control signals and the storage of the incoming data.
